JOB POSTING

Job Title: Application Systems Analyst

KYB Americas Corporation, a subsidiary of one of the world's largest manufacturers of shocks, struts and hydraulic components, and a global leader in ride control technology, has announced the expansion of the KYB Manufacturing facility in Franklin, Indiana.

KYB Americas Corporation is growing and we're seeking an Application Systems Analyst to join our team! If you are interested in a growing, fast-paced, collaborative company with lots of opportunity and a company who understands the importance of work / life balance, KYB Americas Corporation is the place for you!

Purpose of Position/Summary:

The Application Systems Analyst will be a part of the Information Technology Department. This position will be responsible for maintenance, testing, and supporting QAD and all related systems and users.

Essential Duties/Responsibilities:

- Create programming changes as defined by the process owners to meet business needs;
- Preserve a consistent and usable interface over the database and business logic provided in a multi-tier environment;
- Provide program change management, unit testing or other testing and help in developing plans to complete projects assigned;
- Perform tasks as required to help resolve calls to the Help Desk using strong analytical and problem solving skills, including but not limited to: performing the programming necessary to correct the problems;
- Integrate other 3rd party software into the common architect / framework as seamlessly as possible;
- Participate in team or corporate projects that are designed to improve the quality of products and services;
- May be required to spend time on research and development of new software packages, latest versions of supported software and new directions in hardware technology;
- Other duties may be assigned by immediate Supervisor or Manager on an as needed basis.

Job Requirements:

- Bachelor's degree in Computer Science or related field from an accredited institution is required. 4-6 years of related experience may substitute for a college diploma. Versed in systems development methodology is required. Working knowledge of Windows Server, Linux and VMware systems is required. Strong working knowledge of Active Directory and Web Services is required. Progress Database experience is preferred but not required. Proven ability to completed tasks as assigned. Strong analytical, problem-solving, interpersonal and communication skills required. This position requires the ability to be motivated and eager to take on new challenges in a team environment and work with minimal supervision. This position may require the ability to work evenings, weekends and/or holidays to complete project deadlines.
