JOB POSTING

Job Title: Network Engineer

KYB Americas Corporation, a subsidiary of one of the world's largest manufacturers of shocks, struts and hydraulic components, and a global leader in ride control technology for both OEM and Auto Care (Aftermarket) industries, is growing and we're seeking a Network Engineer to join our team!

If you are interested in a growing, fast-paced, collaborative company with lots of opportunity, KYB Americas Corporation is the place for you!

Purpose of Position/Summary:

The Network Engineer will be a part of the Information Technology department. This position will be responsible for maintenance, testing, and supporting the KAC network and connected infrastructure.

Essential Duties/Responsibilities:

- Consults with and assists the manufacturing department's representatives in the installation of new computer equipment; exercises total responsibility for routine installation or modification projects; assists other technicians or the Director in repairing, installing and testing complex pieces of equipment or local area networks;
- Perform and assist in network rollouts, connecting systems, and end user devices;
- Solidify security across a set of workstations, server, instance, and container endpoints using industry leading tools;
- Management, configuration and support of all core and edge network routing and switching devices;
- Perform tasks as required to help resolve calls to Help Desk using strong analytical and problem-solving skills, performing the programming necessary to correct the problems;
- Participate in team or corporate projects that are designed to improve the quality of products and services;
- Provide training to end users of processes and procedures of new technology and systems;
- Other duties may be assigned by immediate Supervisor or Manager on an as needed basis.

Job Requirements:

Bachelor of Computer Science or equivalent in a related field from an accredited organization is required. Four years of relevant IT related experience may substitute for college degree. Understanding of network security methodology. Working knowledge of Cisco routing and switching products and VMware systems. Understanding of Check Point solutions and Carbon Black tools is a plus. Proven ability and desire to meet deadlines is required. This position requires working effectively with minimal supervision in a team environment. Good analytical and problem solving skills is preferred. Strong interpersonal and communication skills is required. Motivated, hardworking and ability to work flexible hours is required of this position.
