JOB POSTING

This document is used to provide a basic description of essential duties and other work elements.

Job Title: Metal Finishing Engineer

KYB Americas Corporation, a subsidiary of one of the world's largest manufacturers of shocks, struts and hydraulic components, and a global leader in ride control technology for both OEM and Auto Care (Aftermarket) industries, is growing and we're seeking a Metal Finishing Engineer to join our team!

If you are interested in a growing, fast-paced, collaborative company with lots of opportunity, KYB Americas Corporation is the place for you!

Purpose of Position/Summary:

The Metal Finishing Engineer is responsible for assuring metal finishing processes such as paint and plating meet all quality specifications. This position is responsible for ensuring that painting and plating processes are within the correct tolerances for chemistries. This position works with the Metal Finishing Supervisor to ensure all processes achieve company goals for quality at the most efficient cost.

Essential Duties/Responsibilities:

- Ability to maintain, troubleshoot and improve hard chrome plating and painting operations;
- Oversee chemical inventories;
- Plan production operations, establishing priorities and sequences for manufacturing products, utilizing knowledge of production processes and methods, machine and equipment capabilities and staffing requirements;
- Ensure processes are operating at optimum and maintained to achieve production targets for QCD;
- Supervise special projects as assigned to enhance associate productivity and functionality of equipment and processes;
- Support Maintenance staff in equipment upgrades and repairs as needed;
- Implement safety and good housekeeping standards;
- Keep Management informed of developments as they occur;
- Maintain compliance with relevant regulatory requirements;
- Ability to work various shifts including nights and weekends as needed;
- Domestic and international travel is on an as needed basis;
- Other duties as assigned.

Job Requirements:

Bachelor of Science degree in Chemical Engineering, or appropriate related technical discipline, is required from an accredited institution. 4-6 years of related experience may substitute for a college diploma. One year of experience in a Chemical Engineering role in a manufacturing environment is preferred.

Experience in Safety and environmental certification is strongly preferred. ISO 14001, ISO 45001 and/or automotive-related internal auditing skills, as well as laboratory and waste water treatment experience is a plus. This position also requires the ability to work in a cross-functional, fast paced environment, and manage multiple activities simultaneously. Microsoft skillset is required. This position requires the ability to identify and resolve issues without direct supervision. Excellent analytical, negotiation, project management, organization, and problem solving skills are required. Excellent communication, both written and verbal, skills required.

ABOUT US:
